

LINSEIS

Thermal Analysis

DSC

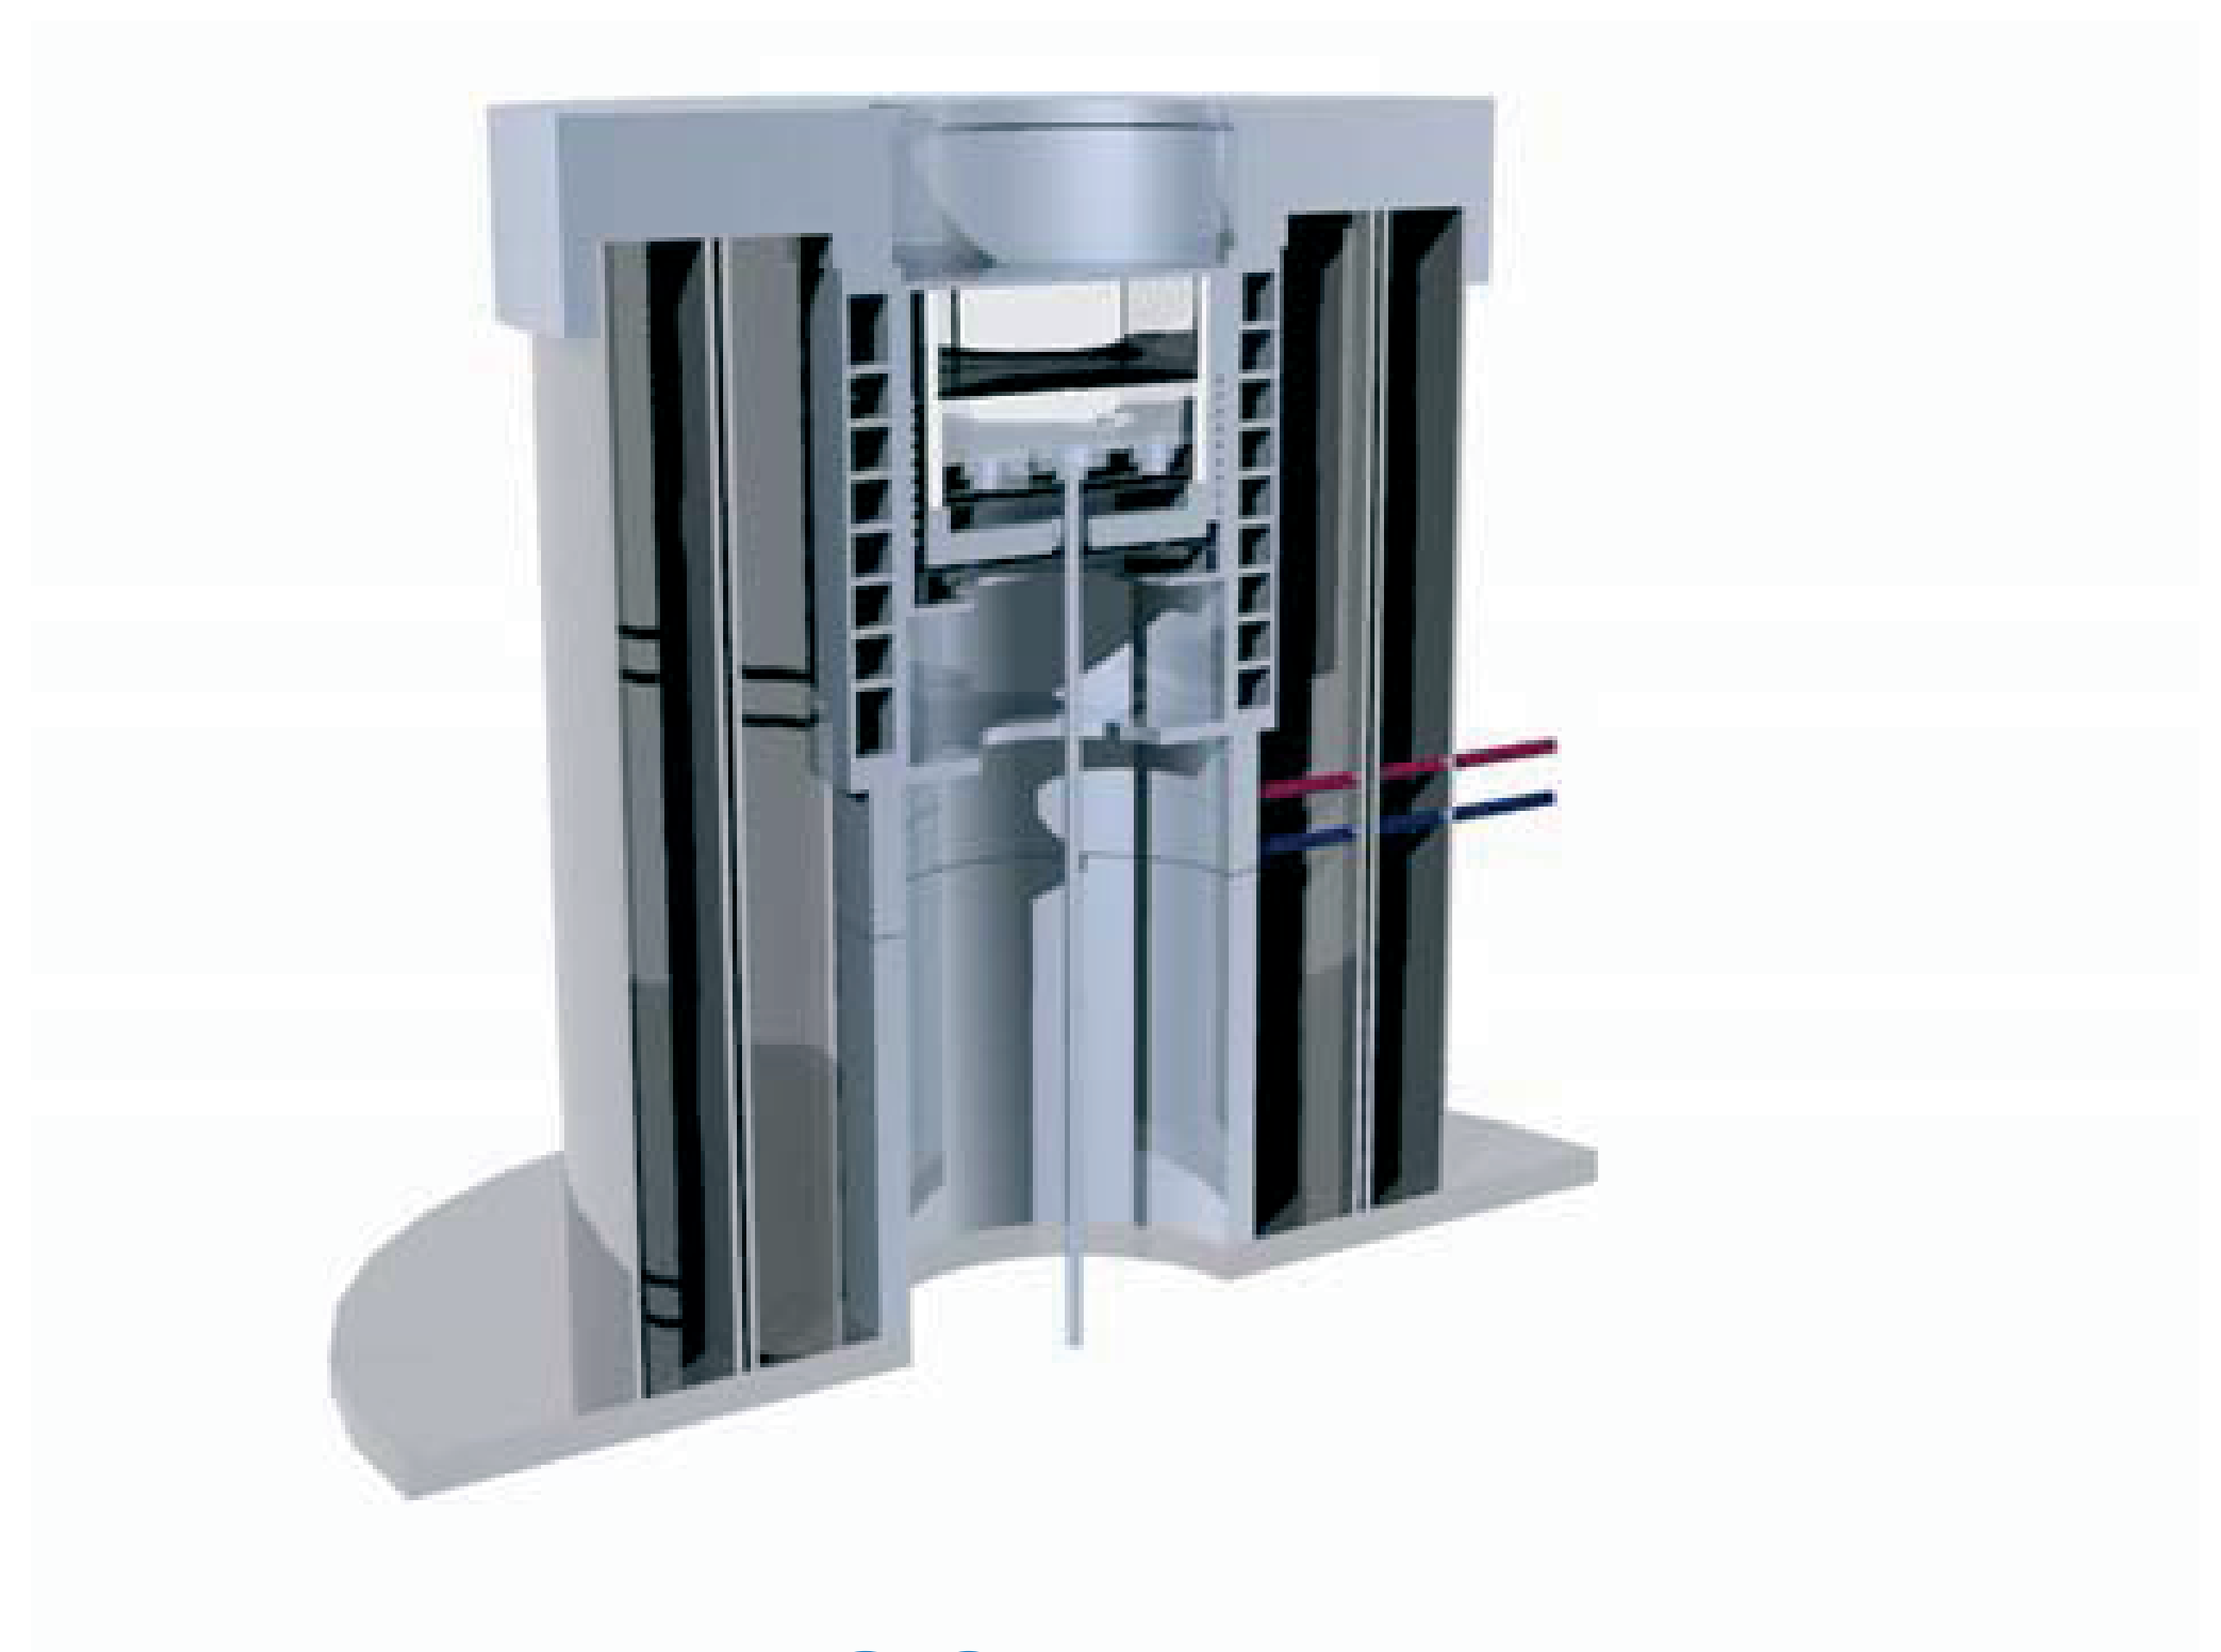

Differential Scanning Calorimeter

- Research & Development
- Quality control
- Quality assurance
- Process optimization
- Failure analysis

Applications:

- Reaction enthalpy
- Melting point
- Temperature of decomposition
- Transformation temperature
- Thermal stability
- Oxidation behavior
- Chemical reactions
- Phase transitions
- Glass point
- Purity test
- Aging performance

DSC PT10

-150 up to 700°C
